INTRODUCING FHNG

FHNG provides a concentrated exposure to global innovation leaders by investing in highly traded growth stocks of tech and tech-enabled companies. FHNG tracks the NYSE® FANG+™ Index (AUD Hedged), which contains 10 companies across the Information Technology, Consumer Discretionary and Communication Services sectors that are hedged back to the Australian dollar.

DID YOU KNOW?

The acronym 'FANG' was first coined by CNBC's 'Mad Money' host Jim Cramer in 2013.

WHAT ARE FANG STOCKS?

FANG is used to collectively refer to the four high-growth technology stocks dominating our lives and the market: Meta (Formerly Facebook), Amazon, Netflix and Alphabet's Google. FHNG seeks to invest in stocks at the leading edge of next-generation technology that includes household names and newcomers.

FHNG SECTORS

- **Information Technology:** is the use of computers to create, process, store, retrieve, and exchange all kinds of electronic data and information.
- **Consumer Discretionary:** is goods and services that are considered non-essential by consumers, but desirable if their available income is sufficient to purchase them.
- **Communication Services:** is the act of communicating using any system or the act of transmission and receipt of information between two or more points.

HOW FHNG WORKS

- FHNG tracks the NYSE® FANG+™ Index (AUD Hedged).
- The index provides exposure to 10 of today's highly traded tech giants.
- To qualify for inclusion, companies must have a minimum market capitalisation of US\$5bn and a 6-month average daily turnover of US\$50m.
- Companies are equally weighted and rebalanced quarterly.
- FHNG is currency hedged to Australian dollars.

HOW TO USE FHNG IN A PORTFOLIO

- Exposure to international growth through companies with globally diversified customer bases and revenue streams.
- Complement your exposure to technology with tech-aligned companies outside of the GICS classification.
- As a thematic tilt towards megatrends.
